

LIFE ON MARS

By: JE'KOB

Verse 1

Don't let them find one organism, & got the nerve to call that life /
Yet they say that my baby's not alive until it lives outside my wife /
But the church stay complacent, walking with the world adjacent /
I guess it's more important to talk about the Illuminati & Masons /
And tell me if that ain't no baby tho, then why am I buying these baby
clothes? /

And why am I buying this baby shampoo to wash my little baby's fro? /
They want us to conform, but daddy said to never lie /
The truth will set you free /

Chorus

Why are we looking for life on Mars
When we don't respect life on our, Planet Earth, Planet Earth, Planet Earth Oh
Planet Earth, Planet Earth, Planet Earth Oh
Planet Earth, Planet Earth, Planet Earth Oh

Verse 2

The numbers don't lie in this day & age /
For children today in your mother's womb is the most dangerous place /
So maybe they could hop in a flying car, and if they wanna have a kid they
could fly to mars /
Maybe if they conceive on the red planet, then we might all agree just where
life starts /

Kill that noise, life is not a toy /
That aint E.T. that's a girl or a boy /
I'm goin in that's how I'm goin out /
And backin' down aint what that boy's about /
They want us to conform, but daddy said to never lie /
The truth will set you free /

Chorus

Why are we looking for life on Mars
When we don't respect life on our, Planet Earth, Planet Earth, Planet Earth Oh
Planet Earth, Planet Earth, Planet Earth Oh
Planet Earth, Planet Earth, Planet Earth Oh

Verse 3

So while we livin' right here on planet earth uhh /
I'm a tell ya'll what this life is really worth uhh /
Yeah, and I'm a start with what the word said /
Life's no accident, we're all accounted for, down to every hair on your head /
That goes for the baby that we lost, for the babies that they tossed /
In a culture of death from the east to the west /

Every one of us need that cross /
Yep, and He paid that cost, so we are no longer in bondage to all this sin /
Gave us His grace, gave us the word, so that we humans would know how to
live /

But ain't it spectacular, how we need that blood like Dracula /
& Lord knows that we can't stop actin' up /
So we pass these laws /
Etching in stone while our mindset is flawed /
Roe vs. Wade brought a genocide on /
People convinced that what's right is now wrong /
Our Governments happily erasing God! /

Chorus 2X

Why are we looking for life on Mars
When we don't respect life on our, Planet Earth, Planet Earth, Planet Earth Oh
Planet Earth, Planet Earth, Planet Earth Oh
Planet Earth, Planet Earth, Planet Earth Oh
